

Need Food Control Plan or National Programme Verification?

INSPECTION AND
CERTIFICATION

We can make it simple.
We take a collaborative
approach to verification
and deliver value
beyond basic regulatory
requirements.

With 1800 people, connected deeply to our partners across the food production industry, we offer the broadest range of food assurance services in New Zealand. We work alongside our partners across their food supply chain, sharing and applying knowledge and insights gained from over 100 years of experience. Helping them to uphold what Aotearoa stands for in food – a higher standard of quality and safety.

Under the Food Act 2014, all businesses producing or handling food are required to be registered with MPI and follow a Food Control Plan or National Programme. This is to ensure that they have good food safety practice and keep their customers safe. As an MPI recognised verifier, we can verify food businesses operating under a Food Control Plan or National Programme.

We are dedicated to helping businesses meet food safety and regulatory requirements and work closely with our partners to deliver cost efficiencies and continuous improvement in their operations. As our nationwide team of specialists verify and certify to many other national and international standards, we can combine Food Control Plan audits with others to offer integrated and bundled Certification packages. Please see the back page for more information on this and our other services.

Helping New Zealand's
food sector uphold
a higher standard of
quality and safety.

Choose the food assurance partner that offers:
